

# TOP 10 FREE DEVOPS PROJECTS

# 1. CI/CD PIPELINE WITH JENKINS

Objective: Set up a full Jenkins pipeline for building, testing, and deploying a sample app.

 Project: [Jenkins CI/CD Pipeline for Node.js App](#)

 Focus: Jenkins, Docker, GitHub integration, pipeline scripting.

# 2. KUBERNETES DEPLOYMENT

Objective: Deploy a microservices application to Kubernetes using Helm.

 Project: [Kubernetes Microservices Demo](#)

 Focus: Kubernetes, Helm, GKE-compatible setup, monitoring included.

# 3. INFRASTRUCTURE AS CODE (IAC) WITH TERRAFORM

Objective: Provision AWS infrastructure using Terraform.

 Project: [Terraform AWS VPC Setup](#)

 Focus: AWS, Terraform modules, VPC, subnets, EC2 setup.

# 4. CONTAINERIZATION WITH DOCKER

Objective: Dockerize a multi-service application.

 Project: [Docker Example Voting App](#)

 Focus: Docker Compose, multi-container orchestration, basic CI integration.

# 5. MONITORING AND ALERTING WITH PROMETHEUS & GRAFANA

Objective: Set up real-time monitoring for an app with dashboards.

 Project: [Prometheus + Grafana Monitoring Stack](#)

 Focus: Docker, Prometheus, Grafana, Node Exporter, Alertmanager.

# 6. GITOPS WITH ARGOCD

Objective: Implement GitOps workflow using ArgoCD.

 Project: [ArgoCD Getting Started](#)

 Focus: Kubernetes, GitOps, declarative deployments, ArgoCD.

# 7. ANSIBLE AUTOMATION

Objective: Automate server configuration with Ansible playbooks.

 Project: [Ansible LAMP Stack](#)

 Focus: Ansible, provisioning, server setup (LAMP), automation patterns.

# 8. CI/CD WITH GITHUB ACTIONS

Objective: Build and deploy app using GitHub Actions.

 Project: [GitHub Actions CI/CD for Flask App](#)

 Focus: GitHub Actions workflows, Heroku deployment, testing.

# 9. LOG MANAGEMENT WITH ELK STACK

Objective: Deploy and configure ELK  
(Elasticsearch, Logstash, Kibana).

 Project: [ELK Stack Docker Setup](#)

 Focus: Centralized logging, Docker, Kibana  
dashboards.

# 10. CLOUD DEPLOYMENT WITH AWS CDK

Objective: Use AWS CDK to deploy an app with infrastructure.

 Project: [AWS CDK Samples](#)

 Focus: CDK (Python/TS), CloudFormation, full-stack app deployment.
